MERN Stack Project Guideline

1. Project Overview

Students are required to develop a **web application using the MERN Stack**(but not limited to MERN)

Projects must demonstrate **CRUD functionality**, proper UI design, and clean code structure.

2. Documentation Requirements (Mandatory)

Submit a **PDF or Word document** containing:-

1. **Project Title**
2. **Group Members** (Minimum 3 students)
3. **Problem Statement**
4. **Objectives**
5. **Functional and non-Functional requirements**
6. **System Architecture (MERN Stack Overview)**
7. **System Features**
8. **ER Diagram / Data Model** *(Optional)*
9. **Database Schema (MongoDB Collections)** *(Optional)*
10. **API Endpoints** *(Optional but Recommended)*
11. **Screenshots** *(Optional)*

- Login
- Dashboard
- CRUD operations

11. **Conclusion & Recommendations**

3. Presentation Requirements

Duration: 5–15 minutes

Students must demonstrate:-

- Application overview
- Login / Authentication
- CRUD operations (Create, Read, Update, Delete)
- UI responsiveness (React + CSS framework)
- Backend API interaction

- Code explanation (Frontend, Backend, Database)

4. Grading Criteria (Rubric)

Category	Points
UI Design & Responsiveness (React)	15
Correct HTML/CSS & JSX Usage	10
Use of Tailwind / Bootstrap / Material UI	10
CRUD Functionality	20
Backend Logic (Node.js & Express)	15
Database Design (MongoDB)	15
Documentation Quality	10
Presentation & Code Quality	5
Total	**100**

Notes

- PHP/MySQL projects are **not accepted**
- Code should follow proper folder structure and best practices
